Create Your Portal Account

Aberdovey Rider Portal | Last updated: 7 October 2026

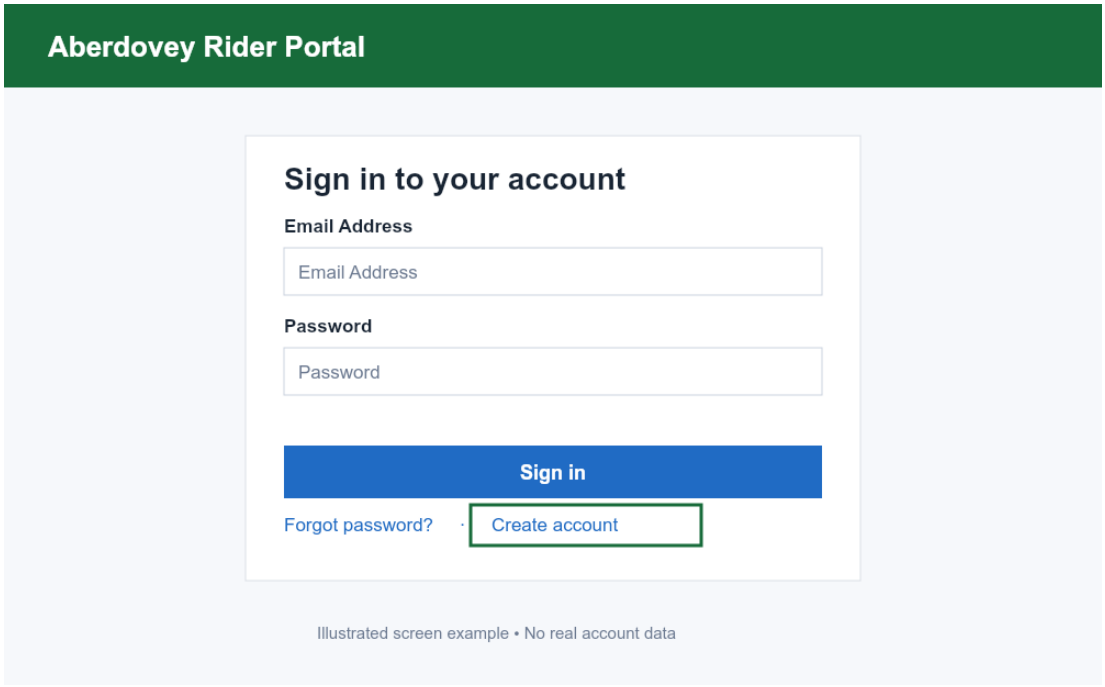

Create an account to sign in to the portal and start your rider profile. **Creating an account does not register you for a ride.** Ride registration and payment are separate steps after signing in.

Your route: Login page → Create account → complete your details → Create Account → Go to Sign In.

The images below are illustrated screen examples based on the current portal form, rather than live screenshots. They contain no real account details. Follow the labels and password checks on your own screen.

1. Start at the login page

1. Open the portal login page.
2. Below the **Sign in** button, choose **Create account**.
3. If you are using the embedded registration login, use the link beginning **If you have not ridden before then please create an account**. It opens the account form in a new tab.

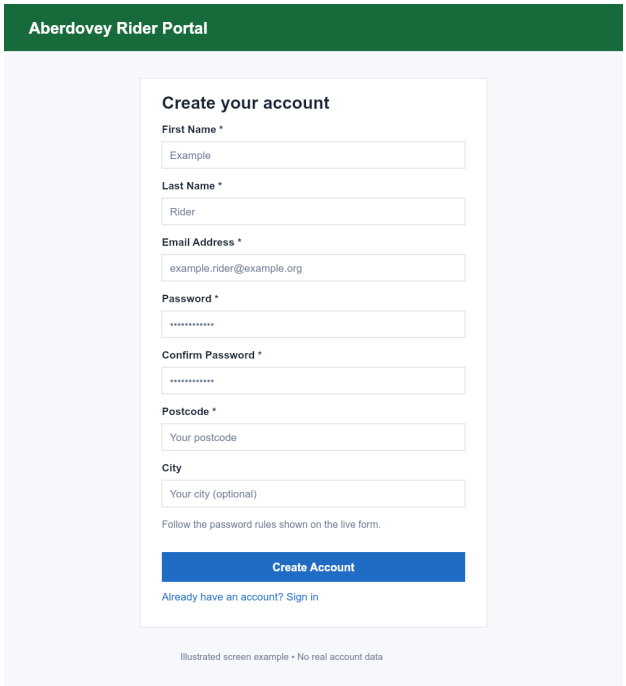

If you already have an account, sign in to it. Use **Forgot password?** if needed instead of creating a duplicate account.

2. Complete Create your account

Enter the following details:

Field	What to enter
First Name	Your first name.
Last Name	Your surname.
Email Address	An email address you can access. Use this when signing in.
Password	A new password that meets the rules below.
Confirm Password	Enter the same password again.
Postcode	Your postcode.
City	Your city or town; this field is optional.

Your password must:

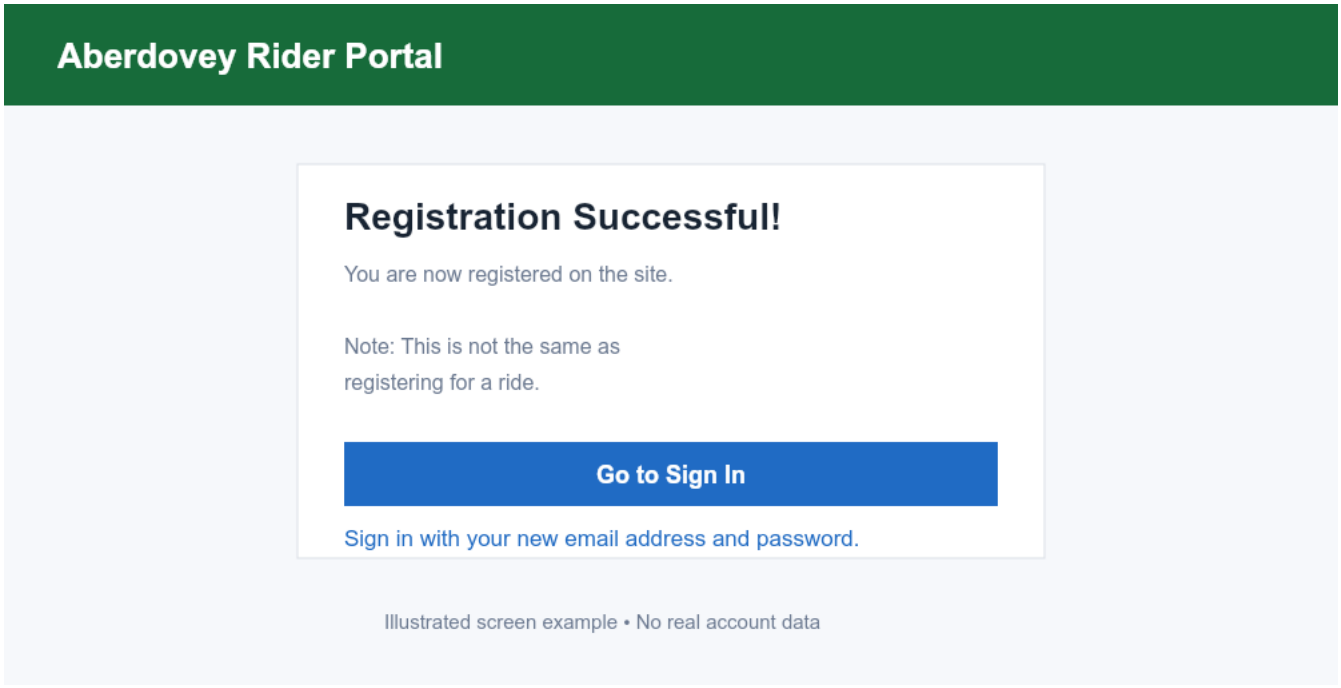

- Have **8–20 characters**, including at least one uppercase letter, one lowercase letter and one symbol.
- Avoid three or more consecutive or repeated letters or numbers.
- Avoid common or qwerty-style passwords and parts of your email address.

The form checks these rules as you type. The eye buttons let you check the password entries. Do not use the masked example in the image as your password.

Check your email address and both password entries, then select **Create Account**.

3. Confirm creation and sign in

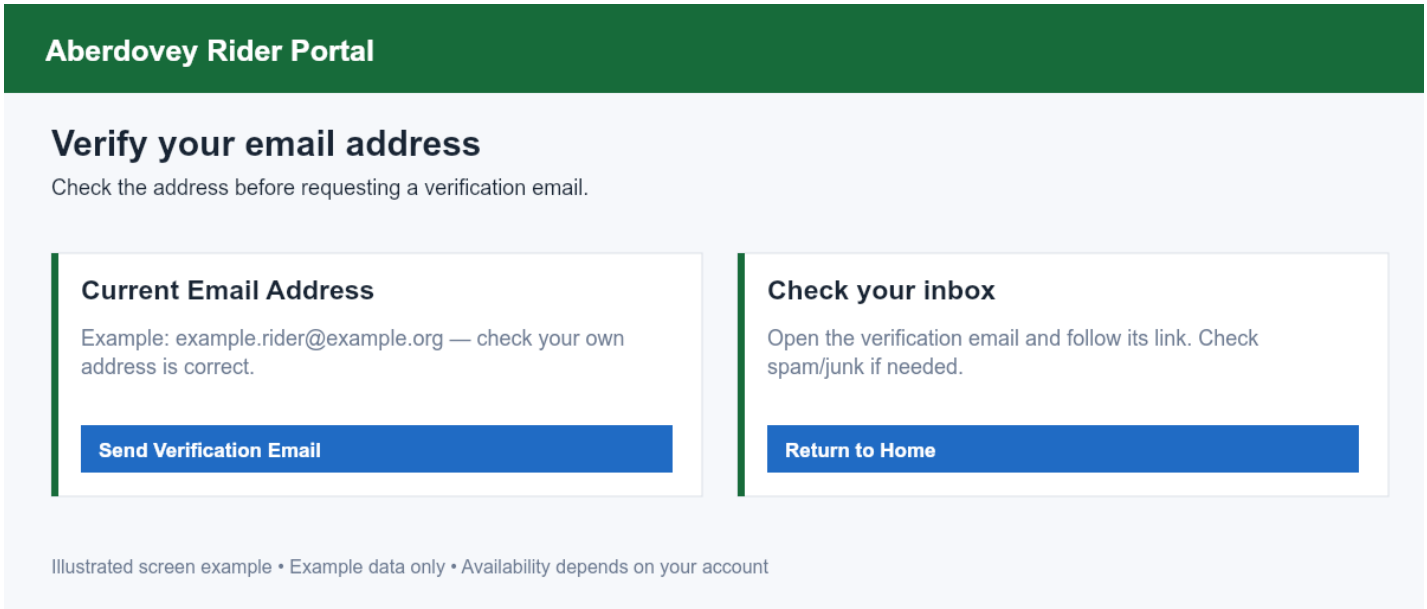

A successful submission displays **Registration Successful!** and **You are now registered on the site**. The same screen reminds you that this is separate from registering for a ride.

1. Select **Go to Sign In**.
2. Enter the email address and password you used when creating the account.
3. Select **Sign in** to open the homepage.

4. Verify your email and continue your profile

If the homepage displays an email verification notice, select **Verify Email Now**, check **Current Email Address**, and choose **Send Verification Email**. Open the verification email and follow its link. Check your spam or junk folder if it does not arrive; use the verification page to request another email if offered.

After signing in, use **My Details → Personal Information** to review your personal details. When ride registration is open, follow **Register for Ride** on the homepage to register for the ride and provide the additional rider details requested there.

For the next steps, see Register for a Ride. If you have already registered for a ride and still need to pay, see Paying for Your Ride After Registering.

If something goes wrong

What you see	What to do
Email address or username already in use	Return to login and use **Forgot password?** for the existing account.
Passwords do not match	Enter the same password in both password fields.
A password rule is not satisfied	Follow the checks shown below the Password field, then try again.
Registration Failed	Read the message, choose **Try Again**, and correct the details.
You cannot sign in after creating the account	Check the email address and password. Use **Forgot password?** if necessary; contact the organisers if the problem continues.

Do not send your password to the organisers or anyone else.
